Tools & Platforms: Git, Postman, Docker, Figma, Linux, VS Code

Work Experience

Job Title: Freelance Full-Stack Web Developer & UI/UX Designer
Type: Self-Employed / Freelance

- **End-to-End Development:** Delivered custom web solutions for clients, managing the entire lifecycle from requirement gathering and UI/UX design to coding.
- **UI/UX Design:** Designed modern, user-friendly interfaces using **Figma**, creating wireframes and high-fidelity prototypes that align with client requirements.
- **Frontend Implementation:** Translated design mockups into responsive, pixel-perfect websites using **HTML5, CSS3, and JavaScript**.

Technical Project

Social Media Automation Tool (Node.js, Puppeteer)

- Built a **Puppeteer** bot to scrape follower lists and identify unfollowers via data comparison.
- Implemented human-mimicking algorithms to bypass anti-bot detection systems.

IT Department Management System (React, Node.js)

- Developed a web app to manage lecturers, students, and classrooms with full **CRUD** functionality.
- Designed a **relational database** to efficiently link student records with specific rooms and class levels.

Clinic Website UI Design (Figma)

- Designed a modern User Interface (UI) for a medical clinic website, focusing on a clean and trustworthy aesthetic.

Interests

Focus: Full-Stack Web Development
Personal Pursuits: Passionate about self-learning new technologies
